

Your partner for medical technology systems

STÜKEN
MEDICAL

Solutions and precision from the market leader

Founded by Hubert Stüken in Wuppertal, Germany, in 1931, STÜKEN today is considered the global market leader for precision deep-drawn metal components. In addition to stampings, injection-molded components and complex assemblies, our assortment includes our patented thermal process SWEPI5®.

STÜKEN employs more than 1,200 staff globally at our five manufacturing sites in the USA, the Czech Republic, the People's Republic of China and our headquarters in Rinteln, Germany. Our forward-thinking STÜKEN MEDICAL division provides expert solutions to customers in the medical technology sector.

New possibilities – also for your product design

Our product range is unrivalled and features more than 2,000 different components. Our specialist team will work together with you to develop a solution to your exacting standards. As the technology leader in our field, we have developed an advanced technology for cold-forming titanium in multiple stages. Our innovation extends the spectrum of deep-drawn titanium components to complex geometries and long, slim tubes. This opens up a whole new range of possibilities – also for your product design.

Our range for medical technology products:

- > Deep-drawn parts
- > Stampings and bent metal parts
- > Injection-molded components
- > Modules and assemblies

Our fields of application in medical technology:

- > Medical devices, e.g. pumps
- > Application of medicines, e.g. for insulin pens
- > Primary packaging of medicines
- > Medical housings and packaging, e.g. for pacemakers

Innovative solutions – efficient production

Our in-house research and development team continually finds innovative solutions, working closely with our project engineering team to match the solution to the optimum manufacturing process. As a traditional German family business we value long-term partnerships, providing the highest standard of service while thinking outside the box. Our project managers will work with you from design through validation to series production.

Teaming up for the optimum solution

STÜKEN is all about comprehensive and competent customer support. Our services include an extensive range of assembly and finishing processes. We provide you with ready-to-use products. When new products require new processes, we will work together with you to find the optimum solution. We will mobilize all available resources for you!

Quality “Made in Germany” packed in our class 7 cleanroom

At STÜKEN quality starts with understanding the requirements of our customers. Your satisfaction is our main goal. Our quality management ensures micrometer precision, the highest repeatability and dimensional accuracy. STÜKEN is certified according to DIN EN ISO 13485.

Precision parts of excellent quality

With over 85 years of experience and the flexibility of a company with global resources, we are able to manufacture economically and meet the high standards of quality required by the medical industry. STÜKEN owns multi-stage and highly efficient cleaning systems as well as two class 7 cleanrooms in accordance with DIN EN ISO 14644 and EU Guide to GMP Class C. This way we ensure that our customers only receive parts of outstanding cleanliness – including full biocompatibility. As a result we manufacture precision parts of excellent quality providing the highest degree of accuracy – perfectly geared to your application.
